

LINEA X EIFFEL

Designed By: Ofício

The LINEA X Eiffel Base brings together architectural inspiration and contemporary workplace design. Influenced by the structural elegance of Paris' iconic Eiffel Tower, its distinctive base transforms a functional meeting table into a refined centrepiece that commands attention without overwhelming the space.

The design is defined by its sculptural steel framework, where angled lines converge to create a strong yet visually lightweight foundation. Every proportion has been carefully considered, balancing stability with openness to deliver generous legroom and an unmistakable architectural presence. The result is a table that feels equally sophisticated and purposeful from every angle.

Created for boardrooms, meeting spaces, collaborative environments, and executive interiors, the LINEA X Eiffel Base is available in a wide range of tabletop sizes and finishes to suit diverse workplace settings. Integrated power and cable management ensure technology remains discreetly organised, allowing the design to remain clean, connected, and uncompromised.

The LINEA X Eiffel Base is more than a meeting table. It is a statement of considered design bringing structure, elegance, and confidence to every space where ideas are shared, decisions are made, and people come together.

Product Description

- A Rectangler Splay Metal Legs
- B 3 or 4 Leg Frame
- C Worktops 25 mm
- D Iniversal Sized and Shapes
