

LINEA X

Designed By: Ofício

LINEA X brings a refined European design language to the modern workplace. Created for spaces where flexibility, functionality, and aesthetics are equally important, it delivers a clean architectural presence that enhances the way people work. Strong in form yet understated in appearance, LINEA X is designed to complement contemporary commercial interiors while supporting everyday performance.

Defined by its distinctive rectangular splay leg, LINEA X offers a confident visual identity with exceptional stability and generous legroom. The angled profile introduces a sense of lightness and movement, while carefully engineered detailing and a durable powder-coated finish ensure a refined, lasting result.

Designed to adapt across a variety of workplace settings, LINEA X is available in a broad selection of tabletop sizes, finishes, and privacy screen options. Whether specified for open-plan workstations, executive offices, collaborative environments, or focused individual workspaces, integrated power and cable management keep every surface organised, connected, and free from unnecessary clutter.

LINEA X is designed to integrate effortlessly into the workplace rather than dominate it. It is a versatile, dependable workstation that combines thoughtful engineering with timeless European styling, creating environments that feel considered, productive, and built to endure.
