

ROCO BOOTH

Designed by Studio Pip in collaboration with Oficio.

Roco Booth gives enclosure a softer expression. An upholstered surround rises around the generous seat, framing the people within and creating a sense of retreat. Rounded edges and carefully balanced proportions bring warmth to its architectural form.

Developed alongside the Roco modular collection, the booth carries the same distinct relationship between seat and back into a more intimate setting. The surrounding panels define a personal boundary while the open front maintains a connection to the room. Contrasting upholstery can emphasise this layered composition, or a tonal palette can bring the elements into quiet continuity.

Each Roco Booth is made to order in Sydney. Precision-machined plywood, high-resilience commercial foam and upholstery prepared by skilled tradespeople give substance to its inviting form. Every stage, from frame assembly to the final seam, receives individual attention.

For libraries, lobbies, civic interiors and workplaces, Roco Booth creates a more personal experience of shared space.

Product Description

ROCO BOOTH

- A CNC-machined plywood frame
- B Reinforced commercial frame construction
- C High-resilience commercial foam
- D Professional water-based adhesive system
- E 200 GSM polyester comfort layer
- F Contrasting upholstery option

RC87MB
Dim overall: 870mm W, 820mm D, 1200mm H
